Laundry **Equipment**

SUPPLY • INSTALLATION • MAINTENANCE

Who we are...

Liver Laundry Equipment Ltd. is a specialist in the supply, installation & maintenance of commercial laundry equipment throughout the North West of England & North Wales.

Based in Prescot Road, Liverpool we have over 40 years experience within the industry, providing a high quality service to all our customers on a same day / next day basis, with more engineers based in our area than any other laundry company.

As part of the highly prestigious Miele professional partnership we offer the highest specification of equipment available, renowned for quality and reliability.

Whether you require rental, lease purchase, outright purchase, maintenance contracts or a maintenance repair, Liver Laundry Equipment will provide you with a wide range of options to suit your requirements.

Our products include washers, dryers, ironers, dishwashers & sluice room equipment supplied to a wide range of diverse industries including Care Homes, Local Authorities, NHS Trusts & Sheltered Housing & many more.

Our services...

Rental

By far the most popular way of acquiring new commercial laundry equipment is on a rental option. Our customers require the equipment to be reliable and working to meet the day to day demands of a busy laundry. When problems arise they need a quick and efficient solution and this is where the rental option comes into its own. As part of a rental agreement full service back up is an essential requirement, this includes all call-out charges, the engineers' time on site and all parts used & preventative maintenance. There is no need to get authorisation for repairs, that can cause substantial delays and any member of staff can call our busy maintenance department for an immediate response.

Problems with owned equipment can lead to unexpected and costly purchases. All our agreements have fixed monthly rates ensuring that from day one to the end of the term you have a budgeted cost for all your equipment.

The needs of your business may also change over a period of time. Rented equipment can be upgraded at any time or indeed should there be any serious problems associated with any of your rented equipment it will be changed without delay ensuring there will be a minimum of disruption to your laundry.

At the end of a rental agreement it will be the optimum time to upgrade or change your equipment. This ensures you will never be in a position where equipment is becoming old and unreliable. Your equipment will always meet the needs of your business and conform to ever changing standards within the industry.

Lease Purchase

Should your preference for acquiring laundry equipment not enable you to enter into long term rental contracts then another option would be lease purchase. Equipment can be purchased over a period of up to 5 years. You also have the option of taking equipment with the benefit of a maintenance contract, running alongside your purchase this gives you the added assurance that you will have no maintenance issues during the lease period.

Purchase

Outright purchase is also available. Purchase the equipment with a 12 months parts & labour warranty or choose to add an annual maintenance contract for the 2nd year.

Our services...

Maintenance Contracts

An important option available to all purchased equipment. This is a complete comprehensive maintenance contract that covers all parts & labour on an annual basis. We cover all major makes of commercial equipment removing the unexpected repair bills that can be both untimely and expensive. Take out the maintenance alongside new or existing equipment and any age of equipment can be covered with one upfront payment or even on a monthly payment basis for multiple pieces of equipment. Unlike extended warranties with exclusions for operator error, wear & tear of disposable parts and failure of services to the machines that then become a chargeable call, our maintenance contract covers all eventualities until the equipment becomes beyond economical repair.

Annual Maintenance Check Option

As part of Gas Safe Register guidelines all gas dryers require an annual gas safety certificate. This option is also available as an add on to the maintenance contract or as a maintenance call out request. The equipment will be serviced, checked and documentation will then be issued to comply with current health & safety regulations to satisfy your insurance company. The laundry room will be assessed

for adequate ventilation, gas isolation, test points, gas hose and all equipment installation.

Installation

There is no need to employ outside contractors to complete installation work to accommodate new equipment. Should there need to be alterations to drainage, water supplies, electrical supplies or gas services, our engineers can complete any work within the laundry room.

Service – Callout

We have a compliment of 8 engineers and other associated tradesmen in Liverpool – more than any other company. This enables us to respond to our customers requirements in the North West area quicker and more efficiently than any other regional or national laundry company. We offer a same day / next day service and hold significant amount of van stocks to ensure that when you have a problem not only can we respond quickly but the problem is resolved on a very high 1st time fix rate.

Products & Markets...

As part of the **Miele Professional Partnership** we are committed to supplying very high quality products, renowned for their build quality and reliability. Starting with the Miele range of “Little Giants” 5 & 6Kg washers and dryers, compact in size but built and tested to commercial specifications, ideal for small laundry rooms found within Housing Associations, Care Homes, Hairdressers and Health & Beauty sectors. Simple and straightforward to use with the new shortcut controls, honeycomb drums, low level water consumption and time saving quick cycles.

Medium to large equipment from 7.5Kg to 32Kg the Miele range of equipment sets the standard for a diverse range of situations. Washers are all WRAS approved with fully programmable controls that allow you to design the right programme for your requirements. Dryers that are heated by gas, electric or steam. Ironers from a width of under 1 metre wide for compact laundry rooms that can be folded away, to large dryer ironers over 2 metres wide. Undercounter freshwater dishwashers with thermal disinfectant cycles specifically supplied to the NHS and Care homes to tank dishwashers with 3 – 5 minute cycles where the need for quick throughput is essential.

With over 40 years experience in commercial laundry equipment we also need to be proficient in the supply & maintenance of all types of laundry equipment, and although Miele remains our number one product range we understand that the needs of our customers are varied. We therefore supply equipment from all major manufacturers including Primus, Ipso, Electrolux & Viking and many more. Over the years our engineers have needed the expertise to work on all major commercial laundry equipment in a varied range of market sectors.
